Perfecto decontamination mat is a type of decontamination mat equipped with a bacteriostatic and bactericidal agent. Decontaminating mat for your practice, consists of thirty numbered sheets and a practical adhesive to secure it to the floor. It contains 30 tears each.

 115 x 45 cm

## Laces cap

The Perfecto laces cap is a disposable cap made of soft, hypoallergenic and breathable Nonwoven Fabric. The product is in one size and is fitted with practical laces.

## Mop cap

Our disposable cap provided with elastic, to perfectly fit any head size. The cap is made in TNT12g/m<sup>2</sup>, and is ideal to gather a patient or operator's hair to prevent it from falling down and spreading germs from the hair or scalp from contaminating the environment. As a matter of fact, as these caps are simply disposed of after use, they help keep the highest level of hygiene.

## Surgical gowns

Perfecto surgical gowns are designed to protect professionals during most procedures, either with high and low risk of infection and penetration by liquids.

Due to the material they are made of 45g/m<sup>2</sup> SMS.

These disposable surgeon gowns are an adequate protection for all operators as they are:

- Breathable
- Comfortable to wear
- Ergonomic – operators can move freely during surgery
- Water repellent – they ensure low particle release rates
- Suitable for various types of operations

 Medium  
Large

## Visitor gowns

Perfecto disposable gowns ensure maximum security and absorbency, while providing complete coverage for doctors as well as for patients.

As a matter of fact, they are part of an overall infection-control strategy:

Firstly, they protect the wearer from the spread of infection or illness if he/she comes in contact with potentially infectious liquid or solid material.

On the other hand disposable gowns prevent the wearer from transferring microorganisms that could harm the patients, especially those with weakened immune systems.

## Sterilization rolls

Perfecto sterilization rolls are produced in blue polyester/polypropylene film. Due to the heavy paper they are made of, sterilization rolls provide reliable performances and high quality.

50mm x 200m  
75mm x 200m  
100mm x 200m

## Sterilization Pouches

For sterilizing, Dispotech produces self-sealing pouches. They are available in several sizes and made in paper-film with a transparent side.

These materials make our sterilization pouches safe and resistant to over-exposure to steam when put in an autoclave, thus making the whole.

Sterilization pouches are meant to contain single medical tools in order to maintain their sterility and protect them from dust and environment.

60 x 110 mm  
90 x 230 mm  
140 x 250 mm  
190 x 330 mm  
330 x 440 mm

75x100cm

75x100cm with U opening

## Cutanplast Fast

CUTANPLAST FAST® is a gelatin product of animal origin that, thanks to its particular structure, is able to be used dry and quickly absorb a large quantity of liquids.

This product is able to control and stop most of the arterial and venous bleeding, difficult to manage with traditional hemostasis methods.

The CUTANPLAST FAST product absorbs in the first minute an amount of liquid equal to 60 times of its own weight.

10X10X4mm  
50X50X4mm  
Powder 1 gram

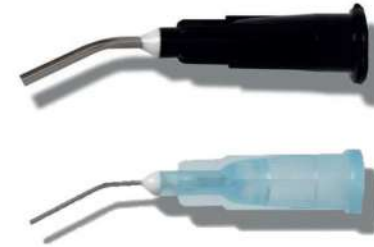

## Cutanplast- Haemostatic Sponge

Cutanplast is a gelatin haemostatic sponge (from pigs) in cubes with a rapid haemostatic effect, disposable and fully reabsorbed. Ideal for haemostasis in post extraction and in cases where bleeding has to be controlled. Cutanplast can be cut and shaped to meet the operator's needs and guarantees a fast, effective haemostatic effect. Its soft and malleable material makes it easy to fit the sponge into the desired area, offering a comfortable and quick relief to the patient.

We can sum up the feature of the Cutanplast dental haemostatic sponge as follows:

- Non-toxic
- Neutral pH
- It absorbs blood corresponding to approximately 50 times its own weight
- Reduces the time of the surgical intervention
- Stops the hemorrhage
- Easy to use and to be disposed of
- It can be reduced in size to any desired format

## Syringe applicator tips

These products are ideal for the precise application of gels. The product is available in two different versions.

20G  
25G

## Disposable bed cover

These products are pre-coated, pre-cut medical disposable sheets. Due to the materials they are made of, they ensure high tearing strength and perfect waterproofness. As a matter of fact, our disposable sheets are composed of one ply of absorbent tissue and one ply of waterproof polyethylene.

7cm x 100m

Avilable in blue and white

## Denture box

Our denture Box is a denture container and prosthesis holder that assures perfect cleaning for all kinds of prostheses and braces. The denture container can be used to store denture prostheses and bites with the maximum hygiene, in water with denture cleaning tabs for prolonged time. The materials have been engineered to resist cleaning products and guarantee long lasting and steady quality .

The container is designed to hold an upper and lower prosthesis and has an inner filter to let cleaning products and residues settle on the bottom.

 90mm diameter x 90mm height

## Ortho box

Ortho box is a practical, functional case to carry orthodontic retainers, bite plates or night guards around in. The ortho box is ideal to gain the utmost hygiene when storing and transporting orthodontic appliances.

The ortho box is in non-toxic, highly resistant and long-lasting plastic. The materials have been chosen to guarantee a high-quality and provide a long life product that maintains good performances over time.

Orange, pink, green, blue, red, purple, black, yellow, fuscia and white

## Hygiene air (air, hand and surface sanitizer)

Hygiene air is first of its kind that is non-petroleum based and allowed a concentrated product to be expelled completely. Kills 99.99% of airborne bacteria. Assist in controlling airborne and surface bacteria, Independently tested and proven. This product has been created in special systems for delivering an effective manner, taking Eco-friendly to new levels in the aerosol manufacturing industry. Minimising carbon footprint and the emission of greenhouse gases with maintaining ecological balance where possible, by using this technology allows you to replace petrochemical gases and an use an ecologically-neutral product to supply to any and all industries.

- HOCl spray

150ml  
300ml

## Dispo gel

Dispo Gel is a kind of hot and cold gel pack designed and produced by Dispotech, which is completely atoxic and suitable also for medical use.

This gel pack can be used for two kinds of therapy: if put in the microwave or in boiling water, it is suitable for heat therapy; otherwise, if you put it inside a freezer, you can use it for cold therapy.

There is a case cover with elastic band available in store in order to avoid potential burns.

- Made in Italy

11x26cm  
14x18cm

Case cover available in: Blue and white

## Ice pack

Dispotech has invented and patented the disposable dental ice packs in TNT, instant dental ice packs soft to the touch. PERFECTO ICE guarantees intense cold that is not aggressive, so it can be used on the face. The dental ice pack reaches a temperature of  $-4^{\circ}\text{C}$  from room temperature in just a few seconds. Dental ice packs are cryotherapy devices, and are the ideal solution for a sudden relief when small injuries occur or after a dental surgery because they help patients manage pain and swelling. Dental ice packs are widely used in the medical and dental sectors for application on the treated area. The product is easy to use and to store.

In a nutshell, we can sum up the advantages of Dispotech's dental ice packs as follows:

- Easy to be disposed of
- They reduce swelling and discomfort due to various post-operative procedures
- Made in Italy
